Chick growth depends partly on natural vigor due to mating stock and normal incubation, and largely on

### Balanced Feed

which perfectly nourishes every part of the growing chick,-flesh, blood, bones and feathers. Grain alone is not balanced since it is largely lacking in proteins-the blood, flesh and feather forming elements. Grain fed chicks frequently grow slowly and feather out poorly. Balance the ideal grain ration, Purina Chick Feed with

### Letters To The Herald

Coars over the Editor El Pase Barala:

Now, that a majority have decided to keep the bat on in the elevator; suppose you start something on the coalina shar in summer. The coalina oringing slave.

I'll open with a "challenga" or "sultatory":

Coats in summer are absurd. They mean perspiration or pentiup profamily. They are no more necessary than women's fure or pincked eyehrows, or rouge dabbed on the cheeks.

Yours for comfort.

Capt. J. D. Bickson.

POLICE PORCE MUTINIES Offines. Only Aug. 23.—Twentysight members of the dominion police
in this city, recently amalgaranted
with the royal Canadian mounted
police, have mutined. They object to
drofting so much of their time to
drofting and also protest because their
wages are insufficient to meet the
mounting cost of living.
